

- 
- **LEG VEIN TREATMENT** (Sclerotherapy, V-Beam Perfecta®, Nd:YAG laser, CoolTouch CTEV)
    - For improvement of small superficial veins (telangiectasia), bluish and torturous veins (varicose) of the legs.
    - A small amount of sclerosing solution is injected into the affected veins, causing the vessel walls to collapse and ultimately go away
    - Often requires multiple treatments for desired results
    - CoolTouch CTEV, a minimally invasive, image-guided procedure utilizes laser energy to close abnormally enlarged or dysfunctional leg veins.
    - May help leg swelling, aching pain, fatigue, cramping, burning or skin irritation due to incompetent leg vein valves.
  
  - **PHOTODYNAMIC THERAPY (PDT)**
    - For pre-cancerous skin lesions (actinic keratosis), acne, skin rejuvenation and some skin cancers and sebaceous hyperplasia.
    - Uses a topical solution or injection prior to laser or light treatment
    - Requires strict sun and bright light avoidance after the procedure
  
  - **ACNE LASER/LIGHT TREATMENT** (SmoothBeam™, ClearLight™, PDT, Isólaz)
    - For treatment of active acne, acne scarring and oily skin
    - Shrinks glands of the skin to treat acne and reduce oil production
    - Stimulates collagen production to diminish the appearance of scarring
    - Requires multiple treatments
  
  - **CHEMICAL PEEL** (Glycolic, Salicylic, Jessners, TCA)
    - Gently removes the top layer of dead skin cells
    - Improves skin texture and color
    - Effective for acne, sun damage and melasma
  
  - **GENTLEWAVES®**
    - This non-invasive treatment uses light emitting diodes to stimulate collagen production in the skin. This leads to smoother and softer skin
    - There is no pain, redness or wounding from the procedure
    - The best results are seen with twice weekly treatments
    - Treatment expedites the healing process of sunburns and laser procedures

---

*The following treatment options may be recommended by your physician:*

---

BOTOX® / DYSPORT® INJECTIONS:

- For improvement of frown lines, crow's feet, neck laxity
- A minute amount is injected, relaxing the muscles that cause wrinkles
- Repeat treatments are required
- One must remain upright for three hours and exercise muscles following injections

FILLER SUBSTANCES (Restylane®, Perlane®, Cosmoderm®, Cosmoplast®, Prevelle, Hylaform®, Hylaform® Plus, Sculptra®, Radiesse®, Juvéderm™, Evolence™)

- For scars, marionette lines, laugh lines, fine wrinkling lip augmentation or volume loss
- Products are injected directly into skin causing diminution of wrinkles/scars and or volume correction
- Repeat treatments are required

NON-INVASIVE REJUVENATION (FRAXEL Re:store™ & FRAXEL Re:store™ Dual, E-Matrix, CoolTouch III, Nd:YAG)

- For fine lines, moderate wrinkles, mild laxity, rejuvenation, sun damage, mottled pigmentation, loss of pigmentation, scars, stretch marks, and enlarged pores
- Minimal to no recovery time for most patients
- Temporary redness, swelling and bronzing of the skin can be seen
- Several treatments are required
- Full benefits may not be seen for several months

RESURFACING LASERS (Erbium, Fraxel re:pair™, Active FX™, Deep FX™, e-Matrix™)

- For sun damage, fine lines, mottled pigmentation, scarring and moderate wrinkles
- Lasers remove upper portions of skin layer by layer in a precisely controlled manner, effectively rejuvenating and tightening skin
- Recovery period can range from 3-7 days
- Patients are red for a few weeks following treatment, but this can be covered effectively with makeup

BODY CONTOURING, CELLULITE REDUCTION (Velashape II™, Thermage CPT™, Zeltiq™)

- Reduces in circumference or size
- Improves skin dimpling, laxity, firmness
- Shapes, contours, slims

LASER ASSISTED LIPOSUCTION (Accusculpt™, SlimLipo™, LipoLite™)

- Removal of small pockets of fat
- Contouring, tightening on the face and body
- Reshape and Rejuvenate

SCAR TREATMENTS (Fraxel re:store™, Fraxel re:pair™, V-Beam™, Q-Switched Ruby™, Q-Switched Nd:YAG Laser™, Relume™, Erbium, Active FX™, e-Matrix™, Injections)

- For raised, depressed and discolored scars
- Multiple treatments usually required
- Combination therapy with more than one laser may be necessary

PIGMENTED LESION REMOVAL (Q-Switched ruby laser, Q-switched Nd:YAG laser, Fraxel re:store Dual)

- For solar lentigines (sun spots), tattoos, nevus of Ota and other pigmented lesions
- Laser selectively targets the pigmented lesion, leaving normal surrounding skin unharmed
- May require multiple treatments

VASCULAR LESION REMOVAL (V-Beam Perfecta®, Gemini™, Cynergy)

- For broken or enlarged blood vessels, redness, scars, hemangiomas, port wine stains and other vascular lesions
- Multiple treatments may be required for desired results
- Minimal to no recovery period, unless treatment for hemangioma or congenital venous malformation

SKIN LAXITY (ThermageCPT™, GentleYAG Laser, Titan, Velashape II, Fraxel (re:pair)™, Active FX™, Deep FX™, Ultherapy™)

- For skin laxity in jowls, laugh lines, forehead, marionette lines, neck, buttocks, extremities, abdomen, eyelids and hands
- Tightens the skin via sustained heating to tissue
- Results may be seen immediately following treatment and continue to improve for up to 4 months

PIGMENT RESTORATION (ReLume™, Fraxel re:pair™, Fraxel re:store™, Fraxel re:store Dual Excimer)

- For scars, stretch marks, vitiligo, areas of decreased pigmentation
- A light source is directed at the affected area, effectively increasing the pigment
- Multiple treatments required

HAIR REMOVAL LASERS (GentleLase®, Apogee, Gemini™, GentleYAG™, LEDA Epi)

- For unwanted body or facial hair
- Unwanted hair is treated with lasers approximately every four to twelve weeks
- Requires multiple treatments for desired results
- An anesthetic cream may be applied one hour prior to treatment to reduce discomfort
